About

I'm a Computer Science Engineering student passionate about technology, programming, and problem-solving. I enjoy learning new skills, exploring innovative ideas, and applying my knowledge to real-world challenges.

I believe in continuous learning and aim to grow as a software professional by combining technical skills, creativity, and effective communication.

🚀 Always learning, building, and growing.

About

I'm a first-year B. Tech student specializing in Electronics and Communication Engineering (ECE), with a strong interest in VLSI design and semiconductor technology. I'm eager to understand how integrated circuits and modern chips are designed, developed, and optimized. I'm currently building my foundation in digital electronics, logic design, programming, and core engineering concepts as I work toward exploring the VLSI domain. My long-term goal is to develop skills in RTL design, Verilog HDL, digital circuit design, and verification, while gaining hands-on experience through technical projects and practical learning. I'm excited to connect with VLSI engineers, semiconductor professionals, researchers, and fellow students who share an interest in chip design and electronics.

About

I'm Nikhil Srivatsa, a passionate engineering student with a strong interest in technology, innovation, and continuous learning. I enjoy exploring how modern engineering and computing principles can solve real-world problems and create meaningful impact. My academic journey has helped me develop skills in Java programming, digital circuits, and logical reasoning, while also strengthening my communication and teamwork abilities. I believe in combining technical expertise with creativity to build solutions that make a difference. Outside academics, I'm deeply interested in music and piano, which inspire my sense of discipline and focus. I strive to grow as a well-rounded professional who values both technical precision and human connection. Goal: To contribute to innovative projects that blend technology and purpose, while continuously improving my skills and understanding of the world.
